Appl. No. : 10/063,530
Filed : May 2, 2002

Principal Arguments and Other Matters

Applicants representatives clarified that the results reported in Example 18 of the instant application reflect mRNA levels, *i.e.* gene expression data. Therefore, whether gene amplification leads to increased gene expression is not relevant to the instant application, and all arguments by the PTO based on references relating to gene amplification are misplaced.

Applicants representatives also stated that it was their view that the correction of inventors requested in the Amendment and Response to Office Action, mailed August 18, 2004, was proper and requested that the PTO's objection be withdrawn and the requested correction entered.

Results of Interview

Applicants representatives and the Examiner agreed that the data in Example 18 reflect mRNA levels, *i.e.* gene expression data, and that whether gene amplification leads to increased gene expression is not relevant to the instant application, and that all arguments by the PTO based on references relating to gene amplification were misplaced.

The Examiner agreed that the request for correction of inventors was proper, and that the objection would be withdrawn and the request for correction entered.

Please charge any additional fees, including any fees for additional extension of time, or credit overpayment to Deposit Account No. 11-1410.

Respectfully submitted,

KNOBBE, MARTENS, OLSON & BEAR, LLP
